# Mission & Areas Served

## Statements

### **Mission**

New Haven Land Trust manages 50 community gardens, operating in every neighborhood, and 6 coastal nature preserves covering approximately 80 acres in the City of New Haven. Our mission is to engage people in the stewardship and cultivation of the land for a healthier community and environment.

### **Background**

In 1982, a group of dedicated visionary people founded the New Haven Land Trust. The founding resolution stated that the NHLT was formed to preserve, protect and enhance the quality of life within New Haven. The organization was to preserve ecologically significant open space in New Haven's densely populated urban area and to create unique opportunities for neighborhood residents to come into contact with their environment. Environmental education and community gardens were singled out as innovative activities for the NHLT. Local neighbors would play an important role in determining the use of the parcels and would be encouraged to participate in Land Trust activities.

Today the New Haven Land Trust continues to honor the vision of the founders. The NHLT owns preserves in six locations comprising approximately 80 acres and two community gardens. It also manages 42 additional community gardens, many on land leased from the City of New Haven.

The New Haven Land Trust sees opportunity in the next 25 years to expand the founders' vision. Community gardens providing food and neighborhood involvement, expanded educational programs, and continued protection of environmental treasures will enhance New Haven's quality of life. Our members, volunteers and staff are dedicated to making a difference in our community.

### **Impact**

In 2016, the Land Trust

- Stewarded gardening activities in 50 gardens across New Haven, engaging over 1,000 gardeners. This past year we completed an infrastructure improvement project in the gardens. These improvements include over 200 raised beds and 250 yards of soil, 16 sheds, 10 picnic tables, and 9 benches. Four community gardens now have hoop houses and an additional six have low tunnels or row covers for season extension. We also purchased Chapelseed Community Garden from the City in December 2016, ensuring that space will remain a garden forever.
- Expanded infrastructure improvements and educational signage in the nature preserves. Nine signs were installed at Quinnipiac Meadows last year and signs will be installed at Pond Lily in the coming year to enhance the educational experience for all who visit these preserves. Over 450 volunteers helped us to build new trails at Pond Lily, improve the trails at Quinnipiac Meadows and Long Wharf, re-plant the banks of the West River with native vegetation at Pond Lily, and clear invasive species.
- Grew our youth employment program, Growing Entrepreneurs, by extending employment throughout the year and hiring additional teens. The teens advance the mission of the Land Trust through business ventures in urban agriculture as they gain entrepreneurial and green job skills.
- Bolstered our educational programming. This past summer we partnered with Schooner and the Boys and Girls Club of New Haven to jointly offer our first summer camp at our Long Wharf Nature Preserve. In addition to this camp, we held 10 educational events this past summer that was free and open to the public, with over 250 people in attendance.

In 2017, we will continue with all of the above-listed efforts and plan to further expand our Growing Entrepreneurs program and our environmental educational offerings.

**Needs**

The Land Trust's most pressing needs this year are:

- Financial support to build capacity so we can increase community outreach and engagement in our gardens and nature preserves. Critical to our success is our ability to support and increase staff time for community outreach, to offer educational workshops, and implement infrastructure improvements on our nature preserves and gardens.
- Financial support to continue improvements in gardens. We plan to continue to build new community gardens to satisfy the interest and need in the community while maintaining our current gardens as sources of fresh, healthy foods. Investments of personnel time and resources to build new garden beds, import clean soil, and purchase tools are necessary to make these new gardens a success.
- Increased funding for research and acquisition of additional parcels of land to increase the size of our nature preserves.
- Volunteers to serve on our Gardens and Preserves Committees, which assist the Land Trust to make decisions and priorities concerning our gardens and nature preserves.

**CEO Statement**

Many New Haveners are still faced with challenges finding stable employment. As a result, low income communities are particularly at risk when it comes to access to healthy food. Our community gardens provide an important resource for community members to have access to healthy food at little to no cost. Contributions to the Land Trust enable us to reach more residents and provide additional garden support such as educational workshops, free seeds and seedlings, water, and access to safe productive growing space to empower more people to sustain themselves and live healthier lives. Residents of New Haven also have limited opportunities to engage in their natural environment, which is why we find it so important to protect areas where they can recreate and enjoy open spaces.

**Board Chair Statement**

We are fortunate that people have become more aware of the environment and the value of our natural resources. Passions for the environment and great programs have enabled us to attract great board and committee volunteers from across the city. The community gardens, preserve and education programs all take the work of many people. We need to challenge ourselves to better recognize outstanding service of our existing volunteers and build on successes in growing our volunteer base. There is much to be done and it is far too easy for us to rely on those loyal volunteer who shoulder so much work. A challenge for our organization is to continually recruit and develop new volunteers by giving them progressive leadership roles in the organization. If we can continue to improve our success at recruiting, retaining and developing volunteers, the New Haven Land Trust will have a even greater impact in the community.

The Land Trust serves every neighborhood in the City of New Haven.

# Programs

## Programs

### Community Gardening

**Description**

The New Haven Land Trust manages 50 community gardens in the city of New Haven, providing technical assistance and supplies. We work with neighborhood residents, tenant associations, block watches, social service agencies, schools, youth groups, and the elderly. By creating community vegetable gardens, we transform vacant urban lots into productive hubs of activity that benefit the community in many ways. The gardens clean up the soil, beautify the neighborhoods, and provide an avenue for healthy exercise, stress relief, enhanced emotional well being, and skill development. It also becomes a family opportunity to work together and teach sustainable living while enjoying delicious home grown bounty. Many of the Land Trust gardens are in resource-poor, low-income neighborhoods and provide access to nutritious food that is free or low-cost, thus easing the strain on household budgets.

**Budget**

\$163,708.00

**Category**

Environment, General/Other / Horticulture

**Population Served**

General/Unspecified / Hispanic, Latino Heritage / Blacks, African Heritage

**Program is linked to organization's mission and strategy**

Yes

**Short Term Success**

Immediate impact - in 2014:

- Stewarded gardening activities in forty-six gardens across New Haven, engaging over 1,000 gardeners as primary program participants; distributed 4,800 seedlings, 600 seed packets, and over 150 cubic yards of compost or garden soil to community gardeners; Installed five new sheds from recycled materials, repaired fencing and built 28 new raised beds at gardens throughout the city.
- Led a series of seven successful gardening workshops, plus a beekeeping demonstration which featured new hives at Liberty-Springside Garden.
- St. Martin de Porres Garden served over 200 through donations to the Downtown Evening Soup Kitchen; the Bethesda Lutheran Garden donated over 90% of what they grew to Christian Community Action up to twice a week; and the Amistad Catholic Workers Garden gave produce to the soup kitchen next door.

**Long Term Success**

Gardeners report increased consumption of fresh produce as a result of gardening;  
Gardeners report community cohesion, more connections with neighbors;  
Gardeners report increased self-sufficiency skills through gardening

**Program Success Monitored By**

The Land Trust conducts a survey at the end of the growing season that each garden manager fills out to report on what's been grown, number of community members involved, activities and events held, challenges and successes.

We recently redesigned our performance measures for the Garden Program to better track impact on behaviors, community conditions, and health and well-being of those involved in the program.

A Garden Committee comprised of six District Garden Coordinators meets every two weeks to report on garden developments and activities, identify key issues and decide on strategies for addressing those issues.

**Examples of Program Success**

Reports from various gardens:

"The garden gets people from different ethnicities and immigrant groups working together. Passersby express curiosity and appreciation for its contribution to the neighborhood."

"People are friendlier. It has made the neighborhood nicer. An area for dumping became a garden. The neighborhood has come together, a place to gather around to admire and talk about." "It gives people a chance to experience nature and grow food. It bring neighborhood people together, in a positive way."

"It gives people a chance to experience nature and grow food. It brings neighborhood people together in a positive way."

"The community gardening program is wonderful and has changed the emotion, economic and spiritual life of the community."

"The community gardening program is a wonderful resource and continues to be a bright spot in this portion of the Hill neighborhood. I have many great stories and pictures of fun and produce growing and harvested over the years."

## Land Preservation

<b>Description</b>	Since 1986 the New Haven Land Trust has acquired approximately 80 acres of land which will remain publicly accessible open space. These habitats include tidal wetlands, coastal upland forest and grassland, traprock ridge, riparian forest and fresh water wetlands. Our goals for these preserved lands are to maintain them in a natural state and to restore areas degraded by human impact to high quality biologically diverse environments for the benefit of New Haven residents and the New Haven environment.
<b>Budget</b>	\$93,656.00
<b>Category</b>	Environment, General/Other / Environmental Education
<b>Population Served</b>	General/Unspecified / Children and Youth (0 - 19 years) / At-Risk Populations
<b>Program is linked to organization's mission and strategy</b>	Yes
<b>Short Term Success</b>	In 2015, Pond Lily Nature Preserve saw a major infrastructure improvement - the removal of a dam, which with the work of many organizations and volunteers will restore the area to vibrant riparian and upland ecosystems. Long Wharf Nature Preserve had new permanent educational signage installed along its trails, invasive removal and native replanting, and we have plans to improve the entrances. Quinnipiac Meadows has been the site of many educational and volunteer activities including the installation of a bat box and trail improvements. We are planning to install new permanent educational signage at this site next.
<b>Long Term Success</b>	It is difficult to measure the absolute impact of the Preserve program on the broader community in terms of awareness raised, knowledge gained, well-being. Our nature preserves are open to the public year-round and we estimate that at least 1,000 people enjoy them each year.
<b>Program Success Monitored By</b>	A sign-in book at the trail heads on three of our Nature Preserves allow us to gather qualitative feedback on visitors' experience of the preserves and their ideas for improvement. We keep track of the # of people who attend our nature walks and collect general feedback from attendees to improve future events.
<b>Examples of Program Success</b>	We are currently improving our process for gathering feedback from visitors that will provide qualitative data on how their experience of the preserves impacted their attitudes, behavior, and knowledge of natural habitats.

## Environmental Education

<b>Description</b>	In 1982 the founders of the New Haven Land Trust were motivated to try to preserve the remaining undeveloped natural areas in New Haven. As land was acquired it became apparent that environmental education had to be part of our mission. Offering guided nature walks both introduced the public to our preserves and reinforced the importance of conserving nature in an urban setting. As a supporting partner, the Garden Club of New Haven made a significant contribution to this effort by developing and teaching a curriculum for school children at the Long Wharf Nature Preserve. We are also pursuing both active and passive approaches by offering free educational activities and events open to the public and by installing educational signage at our preserves. In addition, we are now running Schooner as a signature program of the New Haven Land Trust. The Schooner Program will connect kids, coastline, and community through a series of summer camps and other educational programming.
<b>Budget</b>	\$165,000.00
<b>Category</b>	Environment, General/Other / Environmental Education
<b>Population Served</b>	General/Unspecified / General/Unspecified / Children and Youth (0 - 19 years)
<b>Program is linked to organization's mission and strategy</b>	Yes
<b>Short Term Success</b>	By the end of each workshop or program, participants will report increased knowledge in the subject area and, in the case of gardening workshops, report new skills for growing produce.
<b>Long Term Success</b>	Participants in our gardening and urban habitat education workshops will have an increased knowledge of the urban natural environment and, depending on the focus of the workshop, new skills for gardens or new knowledge of wildlife habitats in New Haven.
<b>Program Success Monitored By</b>	We plan to conduct post-workshop participant evaluation surveys.

## Youth Program

<b>Description</b>	Growing Entrepreneurs, the New Haven Land Trust's new year-round job program for youth, was created in 2016 to extend our summer youth program throughout the year. The teens advance the mission of the Land Trust through business ventures in urban agriculture as they gain entrepreneurial and green job skills—not to mention the profit they earn, on top of their wages. While we are focusing on selling food to restaurants and food trucks in Fall 2016, the program creates space for the entrepreneurs to explore and pilot various business ventures, such as growing the seedlings for the Land Trust's 50 community gardens, selling ready-to-plant raised garden beds to private residences, and processing value-added products.
<b>Budget</b>	\$30,490.00
<b>Category</b>	/
<b>Population Served</b>	//

## Summer Camp

<b>Description</b>	The New Haven Land Trust and Schooner, Inc., joined forces in 2016 to protect and promote the natural and cultural resources of New Haven through access to outdoor environments, conservation, stewardship, and education. This is achieved through land and sea-based programming on New Haven's unique coastline through sailing lessons and environmental education. Campers learn about the habitats and ecosystems of the Long Island Sound, the water systems of the Long Island Sound, pollution, and sustainability, all while having fun in the summer sun. Schooner camp takes place yearly between June - August at the Land Trust's Long Wharf Nature Preserve.
<b>Budget</b>	\$174,352.00
<b>Category</b>	Environment, General/Other / Environmental Education
<b>Population Served</b>	Children Only (5 - 14 years) / Adolescents Only (13-19 years) / Minorities
<b>Program is linked to organization's mission and strategy</b>	Yes
<b>Short Term Success</b>	<ul style="list-style-type: none"><li>-Acquired Schooner Camp in 2016 and hosted over 300 diverse campers between the ages of 6 and 12.</li><li>-Provided an educational program that helps children to experience a different side of their city through science-based learning activities.</li><li>-Sixty percent of the available spaces for campers were filled with children from low-income families on full or partial scholarships.</li><li>-Provided working opportunities for young adults eager to educate children and teens on the importance of nature preservation and the joys of sailing.</li></ul>
<b>Long Term Success</b>	<ul style="list-style-type: none"><li>-Increased camp enrollment and expand to more low-income campers.</li><li>-Permanent Schooner Camp Headquarters.</li><li>-Former Schooner campers become counselors: growing and reinforcing Schooner culture.</li><li>-Year-round Schooner programming for students and building on our curriculum.</li></ul>
<b>Program Success Monitored By</b>	Our program success is measured by camp enrollment numbers, the number of scholarships awarded, and parent surveys. Parents fill out surveys after their child finishes their last camp session. These surveys cover both the child and the parent's satisfaction with the program.
<b>Examples of Program Success</b>	<p>100% of parents had a positive experience with our staff, general operations, and the registration process and would recommend the camp to other parents.</p> <p>94% of parents said their youth had a stronger connection to the Long Island Sound after attending camp.</p> <p>60% of campers on full or partial scholarships.</p> <p>"My child loved sailing, finding crabs and visiting the preserve. We very much appreciated her joy and the positive sentiments she felt about the learning experience as well as the positive impact on her confidence." - Parent of a Schooner sailing camper.</p>

## Program Comments

**CEO Comments**

With the need in New Haven for access to healthy food continuing to grow, the Land Trust's primary challenge is our personnel capacity to conduct outreach, implement projects and provide educational opportunities.

Financial contributions that allow us to increase the amount of time our staff work with community members directly improves our ability to increase the number of community gardens; residents' knowledge on how to garden; environmental education opportunities and volunteer events; and to expand our potential to increase the land that we preserve for the benefit of the New Haven community .

# Leadership & Staff

## CEO/Executive Director

Justin Elicker

### Term Start

Feb 2014

### Email

justin.elicker@newhavenlandtrust.org

### Experience

Justin is a seasoned community leader who brings incredible energy, entrepreneurial spirit and passion for the mission of the New Haven Land Trust.

Professionally, Justin has worked with the Yale Office of Sustainability and served as a sustainability consultant to numerous companies. He has a dual master's degree from the Yale School of Forestry and Environmental Studies and the Yale School of Management. Elicker's community and environmental leadership includes the Friends of East Rock Park, which he reinvigorated with Cedar Hill resident Betty Thompson, and New Haven Green Drinks, which he co-founded. He served for four years on the New Haven Board of Aldermen, spearheading environmental initiatives and serving as an informal advisor to the Food Policy Council. Most recently, he completed a city-wide campaign for mayor. As a candidate, he demonstrated his ability to effectively lead a large-scale outreach effort, raise funds and motivate staff and volunteers to engage thousands of people across the city.

As executive director, Justin manages the organization's administration and programs. He also is charged with organizing and strengthening the Land Trust's already robust network of volunteers in running programs, raising funds and increasing the visibility of the organization.

## Collaborations

The Land Trust's long history has enabled us to develop strong relationships with many regional partners in environmental and urban agricultural issues. We have worked closely with our partners on joint projects that span from jointly run garden and preserve educational programs, to an "incubator garden" program which brings families that have graduated from New Haven Farms' nutrition education program into community gardening, to a large-scale dam removal project to improve fish migration. Partners are critical to our day to day success and important to the long-term success of our organization.
