Mission & Areas Served

Statements

Mission

The mission of The Leukemia & Lymphoma Society (LLS) is: Cure leukemia, lymphoma, Hodgkin's disease and myeloma, and improve the quality of life of patients and their families.

LLS exists to find cures and ensure access to treatments for blood cancer patients. We are the voice for all blood cancer patients and we work to ensure access to treatments for all blood cancer patients.

Background

The Leukemia & Lymphoma Society began in 1949 as the Devillier's Society in memory of one family's loss of their teenage son. The Leukemia & Lymphoma Society® (LLS), headquartered in White Plains, NY, with chapters across the United States and Canada, is the world's largest voluntary health organization dedicated to funding blood cancer research and providing education and patient services. Since its founding in 1949, LLS has invested over \$1 billion in research specifically targeting leukemia, lymphoma and myeloma.

Impact

LLS is the world's largest voluntary health agency dedicated to blood cancer. LLS funds lifesaving blood cancer research around the world and provides free information and support services.

Our Key Priorities will ensure that: *The Leukemia & Lymphoma Society helps blood cancer patients live better, longer lives.*

Needs

Newly diagnosed patients are under enormous amounts of emotional and financial stress. Many blood cancer patients are unable to work during their treatment and this financial hardship, partnered with the rising cost of healthcare, informs the need for LLS' Co-Pay Assistance Program. The Co-Pay Assistance Program is often how a patient first hears about LLS.

Patients also often feel they don't have a support network that knows what they are going through; therefore, LLS' programs like First Connection and patient support groups are extremely important.

There is also a need for LLS' Welcome Back programs to help facilitate reentry back into schools, as school staff often don't know how to explain to other school children what a leukemia patient has gone through.

CEO Statement

LLS is the leader in support and educational programs in the area of blood cancers. The First Connection program is unique to LLS and is often the program that patients state they appreciate the most. The opportunity to have a casual conversation with someone who has gone through exactly what the patient is going through is critical.

Board Chair Statement

In the current economic climate, the challenge that exists for the Connecticut Westchester Hudson Valley Chapter of the Leukemia & Lymphoma Society is our ability to continue raising funds that are used both to serve patients in our community and to support research that is critical to prolonging lives and ultimately to finding a cure for blood cancers. We have addressed this challenge by targeting our events toward various segments of the public using both a geographic focus and a demographic focus. We have also charged our Board of Trustees with recruiting more volunteers to participate at our events and to help raise awareness of the importance of our mission. We have also made great progress in attracting Trustees to our Board that meet the demographic and geographic diversity of our constituents in the Connecticut and Westchester/Hudson Valley Region, NY. Our Board members, our volunteers and our staff, many of whom are blood cancer survivors, are energetic in working toward beating this disease and devote numerous hours organizing and attending events and meeting with families and those whose lives have been changed by the diagnosis of a blood cancer. Its what drives many of us to work tirelessly to raise funds in the race to find a cure.

The Leukemia & Lymphoma Society has chapters throughout the United States and Canada and funds research nationally and internationally.

The Connecticut Westchester Hudson Valley Chapter serves the entire state of CT and the Greater Hudson Valley area of NY, with programs and services.

Programs

Programs

First Connection Program

Description	First Connection is a program that links newly diagnosed patients to a peer volunteer who has experienced a similar diagnosis. The CT Chapter seeks funding for local training of peer volunteers. LLS would like to expand its volunteers to include underserved populations in the communities.
Budget	\$1,100.00
Category	Diseases, Disorders & Medical Disciplines, General/Other / Cancer
Population Served	People/Families of People with Cancer / /
Program is linked to organization's mission and strategy	Yes
Short Term Success	Enable patients and their loved ones to connect with a trained peer volunteer who has gone through a similar experience.
Long Term Success	The provide support and community resource information to others facing a similar diagnosis.
Program Success Monitored By	We monitor how many connections we make during the year here in CT and accross the country. Last year we had 148 First Connections made in CT and 6,000 nation wide.
Examples of Program Success	Through First Connection Program, and other programs I help with I always encourage everyone, patients, family members, and even caregivers to go to these support group meetings. These meeting are a large pot of information. They are also a great way for family members to talk to other families. I have gotten great feedback about that. When I attend the group meetings, I take information from L.L.S with me, when I leave I take questions back to find answers. As it is they are not an US and THEM programs, but WE as one. That is why these programs are so very important. I would not be where I am today if not for these programs. They allhelp people have a better life. Bob S

Family Support Groups

Description	Family Support Groups provide mutual support and education for patients and family members.
Budget	\$2,100.00
Category	Diseases, Disorders & Medical Disciplines, General/Other / Cancer
Population Served	People/Families of People with Cancer / /
Program is linked to organization's mission and strategy	Yes
Short Term Success	The CT Chapter provides 12 different support groups to patients and their families. Some groups are disease specific while others are general.
Long Term Success	We hope to add additional support programs as they are needed so we can provide the support for patients and their families.
Program Success Monitored By	Our Patient Services Managers review each support group with our volunteer facilitators to make sure the groups are a benefit to each person attending and patients and families are getting the resources they need.
Examples of Program Success	I will be forever grateful for having 2 ongoing support groups to attend while I continue my fight against this disease. I continue to attend them in an attempt to give back and assist others as they begin their journeys. They give me a purpose and inspire me to continue to hang in there in the fight to cure this and other cancers in our lifetime. Most sincerely, Ginny B

Co-Pay Assistance Program

Description	Our Co-Pay Assistance Program helps eligible patients with certain blood cancer diagnoses defray the cost of mounting insurance co-payments and insurance premiums.
Budget	\$285,962.00
Category	Diseases, Disorders & Medical Disciplines, General/Other / Cancer
Population Served	People/Families of People with Cancer / /
Program is linked to organization's mission and strategy	Yes
Short Term Success	Last fiscal year, 123 Connecticut patients received \$285,962 in co-pay assistance!
Long Term Success	We hope to reach as many qualified patients as possible to help assist with their medical bills
Program Success Monitored By	The program is monitored by our home office and local ct staff.
Examples of Program Success	"I don't know where we'd be without this program. Every little bit that we can get is a relief for us" -Steven & Charlotte

Professional & Patient Education.

Description	The Leukemia & Lymphoma Society (LLS) sponsors a range of free telephone and web education programs, and local education programs of interest to patients and caregivers. LLS also sponsors conferences and meetings each year for physicians, nurses, social workers, researchers and other healthcare professionals. Live and past versions of these events are provided free to the public as ongoing informational resources.
Budget	\$25,450.00
Category	Diseases, Disorders & Medical Disciplines, General/Other / Cancer
Population Served	People/Families of People with Cancer / General/Unspecified /
Program is linked to organization's mission and strategy	Yes
Short Term Success	Last fiscal year we provided 23 patient and 16 professional education programs in the state of Connecticut.
Long Term Success	Chapters provide free education programs to help clarify treatment options and strengthen decision-making and coping skills for patients and their families.
Program Success Monitored By	Our Patient Services Managers and National Staff monitor the attendance and location of each of the programs to determine where changes can be made.
Examples of Program Success	Many patients and professionals have been able to obtain more information about specific blood cancer diagnoses, testing results and side effects from treatment.
